# ABOUT EZP

EZP Manufacturing Private Limited is born to provide a solution in a precision manufacturing with an innovative engineering at the world class cutting edge technology . . . .

EZP's Engineering Group provides the vast engineering solutions to the customers in various industrial domains including Aerospace, Automotive and Industrial. Engineering Group uses the state-of-art software for the engineering design & development. Engineering Group delivers the support to customer on reducing the development lead time by the strategic process approach with the right tools, effective cost reduction, reliable production and competitive in the market without compromising the quality & lead time.

EZP's Precision Manufacturing Group focus to machine the components from the volumes of one to thousands upon the customer requirements within the desired quality and the lead time. Precision Manufacturing Group uses the state-of-art CNC Machines, Conventional Machines and the Measuring Equipment for manufacturing the precision complex components.

EZP's PMG has the vast experience in manufacturing the various materials like Aluminum, Stainless Steel, Alloy Steel, Inconel, Titanium, etc. for the different domains including Aerospace, Automotive, Industrial. EZP PMG specializes in manufacturing the tight tolerance parts up to 0.0002" in the production mode.

## WHY CHOOSE US ?

EZP's Quality Group assures the quality of the each delivery comprises the various level of the project are well within the defined requirement of the customer. Quality Group is equipped with the state-of-the-art measuring instruments which are always duly calibrated and maintained in the climate controlled zone.

EZP Quality Group complies to the ISO 9001: 2015 methodologies to ensure the product quality is driven through the system of an organization. EZP is committed to the customer on their product quality through the systematic quality plans to ensure the products are manufactured to the required drawings and its related specifications. Quality Group is directed to focus on the trust building with the customer for the delivered products from EZP on every delivery.

**VISION** EZP's vision is to become a world class organization in the precision components manufacturing and an ideal provider to the customer at various industrial domain

**MISSION** EZP's mission is to develop the business with the strategic approach in the manufacturing of the precision components and deliver the utmost quality to the customer on time.

**GOAL** EZP's goal is to have the sustainable growth in the business with the consistent performance and the effective continuous improvement on the entire business processes

## OUR SERVICES

### Engineering Solutions

- Conceptual Design for Manufacturability
- 3D Process Design & Drafting
- Jigs & Fixture Design
- Press Tool & Mold Design
- Turn Key Solutions for CNC Multi-Axis Machining
- CAM Programming & Advanced Simulation
- Legacy Data Conversion
- Advanced Production Documentation
- Manufacturing Data Management
- Advanced Tooling Design
- Gage Design
- Reverse Engineering
- Re-Engineerin

### Manufacturing Solutions

- Precision Conventional Machining
- Precision Jigs & Fixtures Manufacturing
- Press Tools & Mold Manufacturing
- Gage Manufacturing
- Precision CNC Multi Axis Machining
- Contract machining (Job Work)
- Advanced Production Management

### Manufacturing Network Console

- Utilizing the global resource
- Managing the supply chain thru SYSTEM
- Turn Key to Supply Chain with Adv. Mfg. Engg Strategy
- Convert Suppliers to EZP Partners
- Establishing the Reserved Source
- Centralized Engineering Support
- Implementing & Add-on QMS to Resources
- MNC Audit to enhance the performance
- Effective CI Implementation
- Cost Reduction & Savings to Source/ Customer

### Facilities of EZP

- High End CAD/ CAM Software
- State-of-the-art Conventional Machines
- High Tech Quality Measuring Equipment
- World Class CNC Machines
- Plug & Play – CNC Machining Resources
- Experienced Technicians & Engineers
- Climate Controlled Facility

### Key Highlights

- Innovative Engineering Techniques
- Strategic Manufacturing Methodologies
- Smart Production Management
- Deep Manufacturing Knowledge
- Cost Effective Approach
- Advanced Quality Management
- Contributing Success to the Customer through effective continuous improvement

## WHY WE ARE BEST ?

**Our Values**

- | Reliability
- | Innovative
- | Teamwork
- | Respect
- | Perform

**Quality Policy**

Meet the customer's expectation with an effective quality management system through continuous improvement, training and integrating the Quality values in the EZP's Business & Team

**Quality Objectives**

- Implement the Competitive cost Strategy
- Develop the Lean Manufacturing Techniques
- Enhance Manufacturing Efficiency
- On-Time Delivery with zero Defects
- Develop the skills of the EZP Team through training
- Contribute to the Clean environment
